building a better tomorrow

A LETTER FROM OUR CHAIRMAN AND CEO

It's a privilege to present Arch Coal's first formal social responsibility report. In the 10 years since Arch Coal was formed, we've made it a priority to act as a responsible energy company – from our safety practices to our environmental stewardship. Now it is especially rewarding to present a report that encompasses our company's strong values and high operating standards.

I'm extremely proud to work for Arch Coal. And I'm proud of the efforts of my 4,000 fellow employees, whose own commitment to ethical, caring and responsible behavior shows in everything we, as a corporation, do.

I'm proud that we allow integrity to be our guide in every area and at every level of the organization.

I'm proud that we go to great lengths to protect the environment, and that we're committed to making coal an increasingly clean resource through technology and innovation.

I'm proud of our efforts to support our local communities and educational initiatives, including our annual signature sponsorship – the Arch Coal Teacher Achievement Awards. We recognize that a strong educational foundation is needed to keep our nation competitive in a global economy.

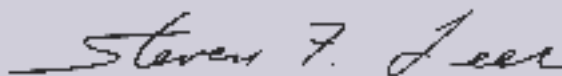

And I'm perhaps most proud of Arch's overall safety record. Year after year, the employees at Arch's subsidiary operations continuously outperform the U.S. coal industry average by a very wide margin.

Why do we do all this? Because it's the right thing to do – for us and for future generations. And because we're firm believers that good corporate citizenship is a central tenet in long-term success.

Looking forward, we recognize that while we have a strong record on which to build, there is still plenty of work ahead. Our pledge is to continue tracking our progress and to share our results with you.

Thank you for taking the time to review this inaugural responsibility report. We invite you to send us feedback at responsible@archcoal.com. We are committed to continuous improvements in all areas of our business to ensure the well-being of our employees, our customers, our neighbors and our shareholders.

Sincerely,

Steven F. Leer

Chairman and CEO

A photograph of a bird, possibly a shorebird, standing in a field of tall, thin grasses. The scene is captured at sunset or sunrise, with a warm, golden-orange glow. The bird is in the lower-left foreground, and its reflection is visible in the water. The background is filled with tall grasses that are slightly out of focus. The text 'our vision' is centered in the middle of the image in a white, serif font.

our vision

WE ENDEAVOR TO CREATE SUPERIOR CUSTOMER AND SHAREHOLDER VALUE
AS THE SAFEST, LOWEST COST AND MOST ENVIRONMENTALLY RESPONSIBLE
SUPPLIER OF COAL-BASED ENERGY IN THE WORLD.

our dedication

Arch Coal is dedicated to being a market-driven global leader in the coal industry and to creating superior long-term shareholder value. In pursuit of these objectives, we will:

- Conduct our business with integrity
- Embrace technology and innovation in everything we do
- Work with customers to develop new and better services which add value to both parties
- Foster a motivating work environment
- Operate safe, low-cost mines
- Act as responsible caretakers of the land, utilizing our resources effectively and efficiently

our commitment

At Arch, we have a social conscience attuned to safety, ethics, the environment, and education.

A critical element of good corporate citizenship is protecting our employees, as well as our company's future contributions. We believe safety is a value, and we expect our workforce to act with integrity above all else.

We care about our community and the environment – for ourselves, for our children and for the generations to come. We're helping fuel America's future by supporting clean-coal technologies. And with a tradition of giving, we reach out to our neighbors through special programs, such as the Arch Coal Foundation's Teacher Achievement Awards, and by devoting our time to nonprofit organizations, such as local schools.

our integrity

Arch believes that good corporate governance serves as the foundation for ethical practices. We are committed to good governance practices and ethical business conduct in every area and at every level of the organization.

Independent directors. We're governed by a board of directors, with 10 of our 12 directors satisfying the New York Stock Exchange's requirements for independence. Our board of directors maintains five committees: Audit; Finance; Nominating and Corporate Governance; and Personnel and Compensation. All of the directors currently serving on the Audit, Nominating and Corporate Governance, and Personnel and Compensation committees are independent.

Ethical principles. Arch is committed to doing business ethically and safely. That is why we have adopted a Code of Business Conduct to outline a set of ethical principles to help guide our daily activities. All newly hired employees receive a copy of this code or its applicable provisions, and all salaried employees are required to complete online training. The code applies to everything we do, from the way we serve customers to the way we safeguard our employees and the environment. The code defines how our employees are expected to treat each other and other stakeholders, including our customers, our suppliers, our shareholders and our communities.

High expectations. We have adopted internal incentive programs designed to reward our employees for delivering value-based results, such as exceptional safety performance or environmental stewardship. These programs are intended to recognize those employees or groups of employees who most exemplify our corporate values.

Anonymous hotline. To ensure that the principles contained in the Code of Business Conduct are maintained throughout our organization, we have 24/7 telephone and e-mail hotlines maintained by an independent third-party as a resource for our employees to seek help and report violations of the Code of Business Conduct or the law. All reports are taken seriously, promptly investigated and immediately addressed, if warranted.

Online access. We invite you to view our Code of Business Conduct and our Corporate Governance Guidelines at www.archcoal.com/investors/corporategovernance.asp.

our safety

WE STRIVE TO OPERATE THE WORLD'S SAFEST MINES.

Prevention is the cornerstone of our safety driven culture.

Employee safety is of paramount importance. That's why Arch and our operating subsidiaries are constantly striving to improve our safety processes year after year. In fact, efforts are currently underway to implement a behavior-based safety process – and we believe Arch is the first in the U.S. coal industry to adopt such a progressive and inclusive approach to safety.

This multi-faceted, behavior-based process targets potentially unsafe behaviors and other pre-indicators of safety performance in an effort to prevent injuries before they occur. Our 360-degree approach includes peer-to-peer observations, statistical analysis and cultural audits.

Our acute focus on employee safety is reflected in mine-specific assessments and process-oriented action plans that seek to identify and correct unique safety challenges through education and training.

We believe focusing on prevention is the best way to reach our ultimate goal of zero accidents and injuries at all of our subsidiary operations. Safety is a core value at Arch, and we remain vigilant in our efforts not only to lead the coal mining industry in health and safety practices, but also to make continuous improvements.

Safety is a core value at Arch.

Our guiding principle is to make sure that every miner returns home safe and healthy at the end of every shift. We set high standards and employ a behavior-based approach to ensure our safety practices are engrained in the culture.

Achieving industry leading results.

In 2006, our Skyline operation in Utah earned the nation's top safety honor among all underground coal mines, the U.S. Department of Labor's Sentinels of Safety award (at right). Skyline employees completed more than 500,000 employee-hours without a single reportable or lost-time injury.

Arch's 2006 lost-time incident rate of 1.23 was nearly three times better than the U.S. coal industry average of 3.37 lost-time injuries for every 200,000 employee-hours worked. Twelve of our mines and plants – representing 46 percent of our operations – worked an entire year without a reportable injury in 2006.

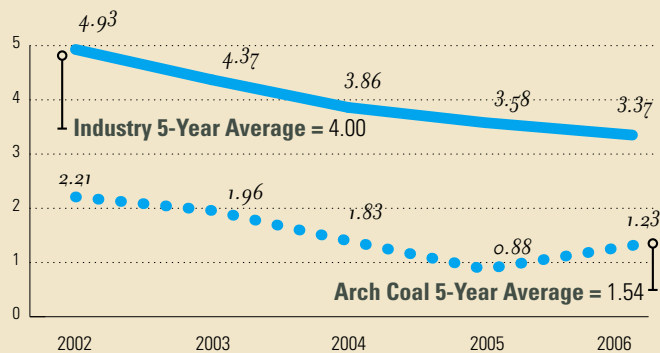

Improving constantly.

We are constantly striving for improvements in mine safety. Arch's five-year safety record has improved 44 percent for total lost-time incidents and 34 percent for total reportable incidents, while over the same time period, our annual production increased roughly 20 percent.

Lost-Time Incident Rates

Per 200,000 employee-hours worked

Championing employee safety.

Our employees not only embrace Arch's safety driven culture, they also are actively engaged in making it stronger. Each year, mine employees set the bar higher, implementing new local safety initiatives, participating in cross operational audits and peer-to-peer reviews, and striving for our most prestigious internal recognition – the ACI President's Safety Award.

Preparing dedicated mine rescue teams.

We pride ourselves on training some of the best mine rescue teams in the world. Arch's rescue teams regularly practice and compete with their peers to hone their skills, and often take home awards. As just one example, Mingo Logan's Mountaineer Mine Rescue Team was named the "Grand Champion" at the 2006 Virginia Mining Institute's two-day rescue competition for the best overall cumulative score.

Ongoing dialogue on safety.

We know that our commitment to operate safely must be embraced at all levels to be effective. Therefore, we illustrate the importance of safety in a variety of employee communication vehicles, such as regular training workshops, custom safety videos and posters, and unwavering management support and accountability.

Award-winning safety practices.

Our commitment to safety is reflected in dozens of state and national awards for excellence earned in the past 18 months.

Subsidiary/Unit	State	Award Description
Arch Coal, Inc.	US	Arch Coal won a first place award for its 17-minute safety training video titled, "Electrical Safety – No Second Chances. Keep the Promise."
Skyline	UT	MSHA recognized Skyline mine for achieving the nation's best safety record among large underground mines.
Dugout Canyon	UT	Dugout mine earned the Joseph A. Holmes National Certificate of Honor for completing 682,537 work-hours without incurring a lost-time injury. Dugout also earned the MSHA Sentinels of Safety Certificate for working 456,600 work-hours without a lost-time injury.
Arch of Wyoming	WY	Seminole II mine earned two Joseph A. Holmes National Certificates of Honor for surpassing 100,000 work-hours with a perfect safety record.
Coal-Mac	WV	Coal-Mac earned West Virginia Holmes safety award for best overall safety performance among surface mines in its class. Coal-Mac also earned a Mountaineer Guardian Award from the West Virginia Office of Miners' Health, Safety & Training for significant accomplishments in mine safety.
Mountain Laurel	WV	Mountaineer II mine received a Mountaineer Guardian Award from the West Virginia Office of Miners' Health, Safety & Training for significant accomplishments in mine safety.

A photograph of a shorebird, possibly a sandpiper or similar species, standing in a grassy field. The bird is positioned on the right side of the frame, facing right. It has brown and white mottled plumage on its back and wings, and a dark beak. The foreground is filled with green grass, some of which is in focus. The background is a clear, bright blue sky. The overall scene is a natural, outdoor setting.

our stewardship

ARCH TAKES ITS RESPONSIBILITY TO THE LAND SERIOUSLY.

SPOTLIGHT ON STEWARDSHIP

Excelling through innovative reclamation techniques.

Since our earliest days, Arch and our predecessor companies have been committed to environmental responsibility – and we will continue to lead the industry in this essential area of performance.

Arch's ongoing pursuit of excellence in reclamation often earns us top honors from the U.S. Department of Interior. Former Arch mine sites in West Virginia, Illinois and Wyoming have won America's top honor, the National Director's Award, for excellence in land reclamation and environmental stewardship over the years.

Mingo Logan's Low Gap surface mine in southern West Virginia was transformed over six years into a world-class, 18-hole golf course for public use. The development of the Twisted Gun Golf Course was integrated into the normal mining reclamation process – and paid for through contributions from Arch, Premium Energy Corp., and Pocahontas Land Corp. Twisted Gun is the only 18-hole golf course in a three-county region due to the great expense of course development in the mountainous terrain.

The former Captain mine in southern Illinois was the largest surface mine east of the Mississippi River at its production peak. The site was reclaimed as a mix of farmland, lakes, wetlands, and forests. Now, these former mine lands are part of the largest state park in Illinois, Pyramid State Park.

The Seminole I mine in Hanna, Wyoming, was named the nation's best example of reclamation in 2005 for establishing diverse and productive grasses and shrubs that have enhanced the quality of life among the wildlife population, including big game, raptors and small mammals.

Technology is the key to responsible coal use.

At Arch, we believe the responsible use of coal can enhance a nation's quality of life, its global competitiveness, its long-term energy security and its prospects for stable and sustained rates of growth. Electrification is a precursor to poverty alleviation, and in many parts of the world coal represents the most reliable, lowest cost and most abundant fuel source for electric generation.

Because of these significant attributes, global coal consumption has increased approximately 25 percent in the past five years, driven in large part by the emerging economies of Asia. Given the great abundance of coal in nations such as China, that rapid growth trend is almost certain to continue. That's why we believe developing cleaner technologies – and promoting their uptake throughout the world – is the clear path to a more sustainable energy future.

For our part, we have invested in – and work closely with – a Denver-based company that has carved out a leadership position in mercury control technologies and processes. We provide financial support to a number of organizations and institutions that are engaged in making coal an increasingly clean energy source. And, through our interest in the emerging coal-to-liquids field via a 24-percent stake in DKRW Advanced Fuels, we plan to be among the first companies to capture and store carbon dioxide generated in the coal-conversion process.

Arch believes that cleaner technology holds the key to a cleaner energy future, and we are taking steps to accelerate the arrival of that future.

Protecting wildlife.

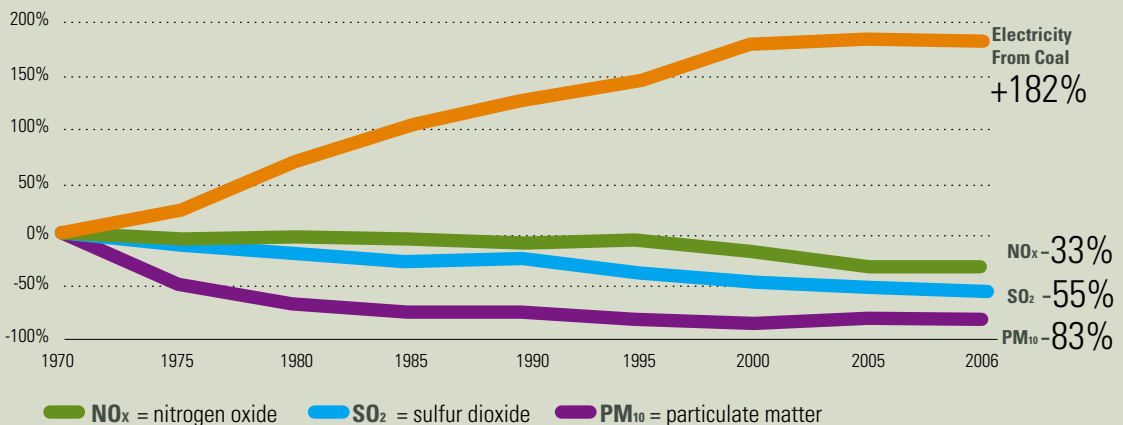

Arch's Black Thunder mine in Wyoming supports the North American ferruginous hawk migration study in conjunction with the Nature Conservancy and the USDA Forest Service, among others. Since 2003, the mine has provided personnel and financial support to track migratory hawk patterns through the use of small GPS transmitters.

Promoting clean coal and clean-coal technologies.

Arch supports continuing advances in making coal an increasingly clean energy resource. Since 1970, emissions from coal-fueled power plants have declined by 50 percent. As a producer of low-sulfur and ultra-low-sulfur coals, Arch has played a significant role in that progress. Further gains are on the horizon. Still tighter U.S. restrictions take effect in 2010, as well as controls on mercury emissions. Arch is working with one of the leaders in mercury control technologies to develop solutions for its customers in the power generation industry.

United States Air Quality

Supporting economic development.

Arch supports economic development on former mine lands. For example, you'll find a wood products park and a lush, 18-hole links style golf course on reclaimed mine lands. Not to mention, the only Arctic char fish hatchery east of the Mississippi River uses clean, pure water from a former Arch mine in southern West Virginia.

Recycling and conserving.

West Elk mine demonstrates environmental leadership as an original contributor and continuing participant in Colorado's voluntary Pollution Prevention Program, which includes a rigorous recycling, reuse and conservation program. Other operations routinely recycle materials as well, from used tires to motor oil.

Planting trees.

Our Coal-Mac operation has planted 600,000 trees on reclaimed lands in southern West Virginia during the past four years, roughly doubling the number originally found at the site.

Developing water resources.

Water is a crucial factor in the amount and quality of wildlife. In southern Utah, our Sufco mine purchased and installed a permanent water guzzler system to help birds and small mammals survive an extended drought. In West Virginia, Arch created more than 250 acres of new wetlands on its former surface mine sites.

Respecting our backyard.

We treat the land and its wildlife with respect, integrating reclamation of the land into every phase of mining. Great care is taken to ensure that the land is restored to a natural and productive state once mining is complete. Not only do we fully comply with the many U.S. regulatory requirements for reclaiming mine lands, we also strive to meet more rigorous internal standards, as well as reward operations that demonstrate great vision and a true love for the native lands.

Achieving awards and recognition.

Governmental and nonprofit organizations often give credence to our efforts as environmental stewards by naming our mines among the best reclaimed sites in the country. Here is a list of our major accolades from the past five years:

U.S. Department of the Interior – National Good Neighbor Awards; National Director's Awards; National Excellence in Surface Mining Award

Department of Environmental Land Quality – Wyoming Good Neighbor Award; Wyoming Reclamation Award

Department of Environmental Protection, West Virginia – Greenlands Award; Wildlife Award

Ducks Unlimited – Wetlands West Virginia Award

U.S. Forest Service – Prairie Partner Award

Department of Public Health & Environment – Colorado Pollution Prevention Award

Western Slope Environmental Resource Council – Conservation Award

Division of Minerals and Geology – Outstanding Contemporaneous Reclamation in Colorado Award

National Association of State Land Reclamationists – Outreach Award

Ruffed Grouse Society – Partnership in Habitat Creation Award

Society of American Foresters – Woodlands West Virginia Award

National Wild Turkey Federation – Wildlife West Virginia Award

Division of Oil, Gas and Mining – Earth Day Award in Utah

our citizenship

WE ARE FIRM BELIEVERS IN THE CONCEPT THAT GOOD CORPORATE CITIZENSHIP
IS A CENTRAL TENET OF LONG-TERM SUCCESS FOR ANY BUSINESS.

ARCH COAL TEACHER ACHIEVEMENT AWARD

Shirley J. George

2003

Teacher Achievement Awards program builds a stronger tomorrow.

We believe our nation's success begins in classrooms led by exceptional teachers. These teachers inspire their students to achieve great things – and Arch recognizes their important contributions to America's future.

That's why one of our largest community programs in Wyoming, West Virginia and Utah is the Arch Coal Foundation's annual Teacher Achievement Awards. We honor 27 outstanding classroom teachers each year with a \$2,500 unrestricted cash prize, a distinctive glass trophy and a plaque.

The program, developed more than 20 years ago by Arch's former parent company, has awarded more than \$400,000 to elementary and secondary educators since its inception. Recipients span diverse backgrounds and teaching specialties, but they all have a common thread: a true passion for student learning.

Second-grade teacher Shirley George (at left) is one of our award recipients. Teaching seven-year-olds at Wagonwheel Elementary in Gillette, Wyoming, George challenges her students to explore diverse subject areas through the use of technology and local resources, and employs a hands-on, student-centered approach to learning.

Like so many of the former award recipients, Terri Cooper reinvested part of her cash prize in her classroom. Cooper rewards three eighth-grade students at Newcastle Middle School in Cheyenne, Wyoming, with \$50 savings bonds for outstanding character and citizenship.

The Arch Coal Teacher Achievement Awards program is unique because it features public nomination and peer selection. After all applications are received, a distinguished panel of experienced teachers, often former recipients, makes the final selection.

We believe that by supporting our best teachers today, we're building a stronger tomorrow.

"Your company is encouraging teachers throughout the state to strive to do their best work – and excellence in teaching results in excellence in learning. I count this as a once-in-a-lifetime experience."

– Bob Robinson, Parkersburg, W.Va.

"Thank you for the wonderful award... it was inspiring and rewarding. These memories will be stored in my heart for a lifetime."

*– Ann Will,
Newcastle, Wyo.*

"I want to thank you so much for your leadership in honoring West Virginia teachers. The Arch Coal Award is something I will always treasure. The ceremony was so very special; as I looked across the aisle to the face of my 76-year-old father, I saw a tear of joy in his eye."

*– Janet Slates Bowland,
Oak Hill, W.Va.*

Being good neighbors.

We strive to be good neighbors from day-to-day and in times of need, such as our Black Thunder mine's quick response to a tornado and its aftermath in Wright, Wyo. Our mine and its employees provided emergency responders, a solution for disposing of 500 truckloads of debris, and free meals to more than 300 homeless residents and disaster relief volunteers. Our operations have been recognized twice by the U.S. Department of the Interior with National Good Neighbor awards for our exemplary interaction, communication and involvement with surrounding communities.

Making a difference.

We're building on a long history of investing in communities – individually and collectively – to make a positive difference where we live and operate. We also demand our personal best each and every day to do the right thing for ourselves, our children and for the generations to come.

Improving daily life.

In Logan County, West Virginia, residents of Mifflin and Sharples gained public water access with the completion of a 10,800-foot waterline extension that was the result of a partnership among Arch and the Mountain Laurel complex, West Virginia American Water and the Logan County Public Service District. The \$1 million extension provides new water service to 90 homes. Similarly, Mingo Logan's Ben Creek operation recently completed the Bee Branch waterline project to provide public access to seven area residents who had relied on well water alone for decades.

Additionally, Arch's West Elk mine funded \$500,000 in new railroad crossings and track realignment along the western slope of Colorado, and our operations have created, extended or improved countless miles of public roads and overpasses.

The Arch Coal Foundation

The mission of the Arch Coal Foundation is to support organizations and causes that are making a positive difference in the communities where Arch operates.

Our Foundation was formed in December 2005 with an initial endowment from Arch Coal, Inc. Our contributions emphasize education, culture and the environment. These funds are used to support organizations who engage in improving the quality of life in the communities in which we operate.

Education has traditionally been one of the largest areas of giving for Arch Coal because we believe quality education enhances our country's competitiveness and advances our future.

Valuing our employees.

A critical element of sound corporate citizenship is the support of a thriving, diverse workforce. Across our national network of mines, we provide our 4,000 employees with a work environment that reflects the words and spirit of the equal employment laws, a variety of training and development opportunities, and an attractive and competitive set of compensation and benefit programs.

Backing our troops.

Thunder Basin has Wyoming 'Five-Star' status as an exemplary corporate supporter of the National Guard and Reserve and advocate for employee service. At the holidays, Thunder Basin's Black Thunder and Coal Creek mines shipped cheese and sausage gift boxes to all 150 of the Wyoming National Guard members serving in Iraq.

In a continuing effort to support the local community and to be good stewards of the land, our Skyline mining complex sponsors a Boy Scouts of America Noxious Weed Control program. Skyline employees and local scouting troops provided more than 200 service hours to reduce the noxious weeds on the U.S. Forest Service lands so that other vegetation has room to grow.

Encouraging energy education.

We welcome more than 5,000 students and other tour groups to our mines each year. Moreover, we support educational organizations that strive to bring teachers and students current information and teaching materials on our energy resources, such as the American Coal Foundation, Missouri Minerals Education Council and CEDAR of Southern West Virginia. In fact, our Coal-Mac mine developed the Coal Education Development and Resource (CEDAR) program, and through our continuing leadership provides in excess of 1,200 volunteer-hours each year.

Our commitment includes the Arch Coal Teacher Achievement Awards, recognizing top classroom teachers in West Virginia and Wyoming. In addition, Arch Coal has granted more than 100 scholarships to employees' dependents seeking secondary education.

Additionally, the Arch Coal Foundation has committed \$100,000 to Marshall University's new Mine Safety Technology Innovation Capability and Regional Business Development program in an effort to identify new technologies and practices for the next generation of coal mining safety.

In the area of arts and culture, Arch has made significant contributions to large cultural institutions and local arts groups in the communities where our employees live, such as the University of Wyoming Art Museum, the Kentucky Center for the Arts and the Repertory Theatre of St. Louis.

The Foundation also supports organizations working to improve the environment. Past contributions have supported the Conservation Fund and reforestation research through West Virginia University.

Nearly all of our financial support goes to organizations in the eight states in which we operate: Wyoming, West Virginia, Missouri, Utah, Colorado, Illinois, Kentucky, and Virginia.

Going that extra mile.

We devote considerable time and talents in improving our communities, from planting trees to supporting education and everything in between. Most recently, our Cumberland River operation has funded an effort for its local school district to conduct teacher and staff training to recognize the signs and symptoms of drug use. Furthermore, we're sponsoring a motivational speaker for an all-school assembly to encourage local students to stay away from drugs.

Promoting student scholars.

The Arch Coal Scholars program honors outstanding scholastic achievement by the children of employees of Arch Coal and its subsidiaries. As many as 11 students are chosen each year for the \$1,500 college scholarships, and through academic achievement the students can renew the scholarships for an additional three years. Since the formation of Arch Coal in 1997, we have awarded more than 100 students with over \$500,000 in scholarships.

Supporting education.

Our employees show enthusiasm for education through involvement in elementary school sponsorships, on-site student tours, and university grants – just to name a few. For example, our Lone Mountain mine adopted a local elementary school in St. Charles, Virginia. Each year, we provide 25 new bicycles and safety helmets for the winners of an annual poster contest. In addition, the mine hosts an annual Earth Day celebration for the school's 350 teachers, students, and chaperones, including the opportunity to trout fish and the gift of a commemorative t-shirt.

SPOTLIGHT ON CITIZENSHIP

Fostering open dialogue through a community advisory panel.

During the initial effort to develop a world-class mining complex in southern West Virginia, Arch and Mountain Laurel encouraged open dialogue with our new neighbors. The result was the formation of a group of citizens who meets regularly at the local volunteer fire station in Sharples, West Virginia. The goal of the Spruce Fork community advisory panel (CAP) is to share ideas, solicit input and build mutual trust among our mining operation and a group of local citizens. CAP members include local residents, clergy and other community leaders.

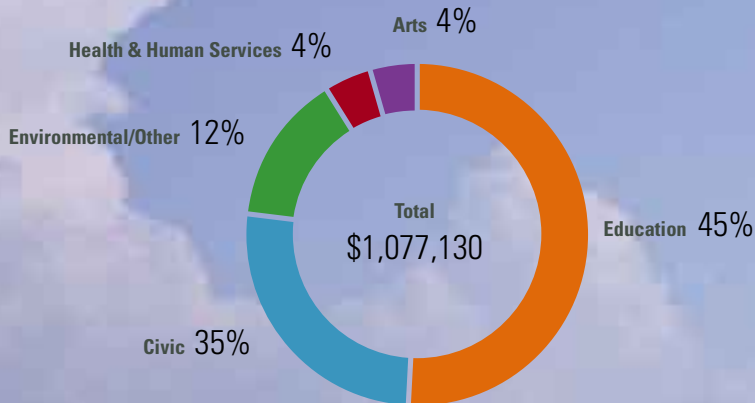

Among the topics discussed are changes that directly impact the community. For example, we worked together to develop a local Crime Watch group that provides additional security to local residents, and Arch funded and built a new bridge in Clothier, W.Va. that now provides residents with a safe and reliable connection to the existing state highway.

Additionally, the Spruce Fork CAP advances educational studies focused on science and the environment through mini-grants provided by the Arch Coal Foundation. Educators in the Spruce Fork area apply for mini-grants and a committee, comprised of CAP members and Arch employees, makes the funding decisions.

To our knowledge, Arch is the first coal company to develop and sustain a community advisory panel with its neighbors at a new mine. The CAP meets over dinner at the firehouse and continues sharing ideas to work toward common goals.

2006 Charitable Contributions

WE PROVIDE COUNTLESS VOLUNTEER HOURS AND MORE THAN \$1 MILLION PER YEAR TO EDUCATIONAL GROUPS AND NONPROFITS IN OUR OPERATING REGIONS

Arch Coal, Inc. is one of the largest and most efficient coal producers in the United States. The company's core business is providing U.S. power generators with clean-burning, low-sulfur coal for electric generation. Through its national network of mines, Arch supplies the fuel for approximately 6 percent of U.S. electric generation.

The terms "we" and "our" refer to Arch Coal, Inc. and its subsidiary operations.
